Maine's Listening and Spoken Language Center

***We help Maine children and adults with hearing loss  
learn to listen, speak and reach their fullest potential.***

**Our Mission Statement:**

*hear ME now*, Maine's leading auditory oral education center, is committed to supporting children and adults with hearing loss, their families, and their communities. We are uniquely qualified to provide the resources, technology, and innovative teaching necessary to foster opportunities to learn to listen and speak.

**Our Services:**

*Children:*

- Now, earlier than ever, infants can have their hearing screened, be referred to an audiologist, and diagnosed with a hearing loss, before any language delays occur.
- With early and appropriate intervention by 6 months of age, including hearing aids and family training, these children have the chance to learn spoken language at a rate similar to their hearing peers.
- What makes *hear ME now!* unique in Maine is our experienced professionals – certified Listening and Spoken Language Specialists, auditory/oral teachers of the deaf, speech language pathologists, audiologists and early childhood special educators specially trained to maximize a child's hearing and promote the development of spoken language.
- Our staff understands that hearing sound is only the beginning. Children must learn to translate those sounds into meaningful words. No child, no family can do it alone. With *hear ME now* they get the understanding and guidance to succeed.

*Adults:*

**Individual Aural Rehabilitation Therapy for Maine Adults with Cochlear Implants**

- We start with a pre-implant orientation session to answer questions, discuss concerns and help prepare adults for what to expect.
- In-post cochlear implant rehabilitation sessions, adults receive individualized auditory exercises from our team. All our adult service providers hold a certification in Listening and Spoken Language (LSLS). *hear ME now* employs the ONLY LSLS therapists in Maine!
- We monitor all progress and work closely with audiologists.
- We conduct a support group for adult cochlear implant recipients and potential candidates. Meetings are held in a social setting, which allows everyone to become acquainted with other attendees and share information and support.
